

The industry's most advanced background screening solution

BACKGROUND SCREENING FOR HEALTHCARE

Comprehensive screening for healthcare safety and compliance

Healthcare organizations are under increasing pressure to ensure a safe and compliant workplace by regularly screening medical staff in order to avoid fines, loss of Medicare/Medicaid and other federal funds, or damage to reputation. The Office of Inspector General (OIG) recommends that employees, contractors and medical staff be checked routinely against OIG and GSA lists. But background checks are often inaccurate and can be tedious, particularly when monitoring thousands of existing personnel. Assure™ is a Web-based background screening solution that applies advanced technology to deliver more comprehensive screening, easing the pain of ensuring workplace safety and compliance.

More accurate compliance screening

Compliance screening for Office of Inspector General (OIG) and U.S. General Services Administration (GSA) exclusion is usually based on a simple name search, which can lead to missed records or a high number of false positives. With Assure, searches are based on a more complete profile of an individual that includes aliases, prior addresses, date of birth, and other publicly available information. Social Security Number verification, normally a tedious manual process, is automated. And since the exclusion lists are often outdated, the basic list search can be enhanced with a national criminal search to identify infractions that will qualify an individual for exclusion in the future.

Nationwide professional licensure verification

Assure goes above and beyond traditional professional licensure verification, checking records in both the current state of residence and our unrivaled nationwide database for a more complete list of all licenses and disciplinary actions associated with an individual. Since some states do not provide licensure information electronically, the nationwide search can also be extended to include a manual search in prior states of residence. As with OIG/GSA screening, searches are based on a more complete profile of the individual to improve accuracy and reduce false positives.

One-stop background screening solution

Assure includes all of the services your organization needs to achieve best practices in safety and compliance, including criminal and sex offender screening, OIG/GSA screening, licensure verification, education and employment verification, drug screening, motor vehicle records, and credit checks. By leveraging Verified Person's unrivaled criminal database and nationwide court runner network, Assure provides the most reliable information available. Assure also eliminates the hassles of ongoing workforce screening by running regular checks automatically and sending a notification when an infraction occurs – for example, if a license is revoked or if an individual is added to the OIG or GSA exclusion lists.

About Us

Verified Person provides the industry's most advanced background screening and identity verification services, applying innovative technology to an outdated industry in order to deliver faster, more accurate results at a significantly lower price. Contact us at sales@verifiedperson.com for more information.

Services

- OIG and GSA Exclusion
- Professional License Verification (including Pharmacy)
